Installing

Use this Installation Guide if you are installing the integration for the first time. If you are upgrading from a previous version, please refer to the Upgrade Guide.

The installation of the Bynder module is very easy. You can use the Magento Marketplace to install this module. Follow the steps bellow to install the module in your Magento webshop:

1. Go to our module page on Magento Connect, login, download the module.
2. Drag and drop the module files in your Magento root directory.
