

Delivery Settings

Delivery options

When customers are allowed to pick a delivery time, these options will be used to request timeframes from PostNL.

Please note that there are additional costs for options other than Daytime. Consult your PostNL pakketten account manager for more information.

Cut-off time

This is the time after which the delivery date estimate will be adjusted by an additional day.

Shipping duration

Time in days it normally takes for a package to arrive. This is used for delivery date estimation and should generally be left at its default value of 1.

Allow Monday delivery

Determines whether or not deliveries are made on Monday (requiring sunday sorting). For more information, please visit [this](#) page.

Delayed delivery

When this is enabled, the customer will be able to specify a later delivery date and time in the checkout.

Maximum delivery delay

The maximum number of days when providing delivery dates to the customer.

Evening / Morning fee

When delayed delivery is enabled, these options allow you to specify an additional fee for morning or evening deliveries.
