

Configuration

Configure your store

Before configuring the module, please ensure that the following things are done:

1. Store information is configured in System -> Configuration -> General -> Store Information, in particular the fields pertaining to the store's address.
2. Shipping origin settings are properly configured in System -> Configuration -> Shipping Settings -> Origin.

Configure your module

Proceed to configure this module by navigating to System -> Configuration -> Sales -> PostNL.

Detailed explanation of these settings can be found in the [Settings](#) section.

Information on the diverse fields in the Configuration settings for the PostNL module can be found in the [PostNL API documentation](#).
