Configuration

Configure your store

Before configuring the module, please ensure that the following things are done:

- 1. Store information is configured in System -> Configuration -> General -> Store Information, in particular the fields pertaining to the store's address.
- 2. Shipping origin settings are properly configured in System -> Configuration -> Shipping Settings -> Origin.

Configure your module

Proceed to configure this module by navigating to System -> Configuration -> Sales -> PostNL.

Detailed explanation of these settings can be found in the Settings section.

Information on the diverse fields in the Configuration settings for the PostNL module can be found in the PostNL API documentation.
